technology integration that makes a difference

SCAN WITH (PRETTY MUCH) ANYTHING

SOMETHING TO RALLY AROUND

* Grade multiple-choice, constructed response, griddables, yes/no, true/false, matching, rubric, score, credit, and multiple-version assignments with any web, iOS, or document camera.

* Transfer scores into any electronic gradebook with just one keystroke.

* Give students immediate, personal feedback.

* Share assessments with other educators in real-time to simplify PLC meetings.

* Link questions to state standards and generate standards-based reports.

* Create and print customized answer forms on plain paper, or go green with reusable forms.

> *Gradecam Go! provides tons of data to guide instruction, gives students immediate feedback and the opportunity to develop critical thinking skills, and saves teachers huge amounts of time with scoring, data entry, and data analyzation ultimately allowing them to focus on what really matters: the creation and delivery of better instruction.*
