

4 STEPS TO A SUCCESSFUL PILOT

Schools and Districts may participate in a free 60-day pilot of GradeCam Go! to explore the benefits of a technology that saves time in the classroom and delivers valuable, standards-based data for decision making. Successful pilots maximize engagement through specific tasks. Follow these steps to increase adoption and effectiveness.

1. Register for the pilot: Go to <http://provenlearning.com/pilot/> to sign-up for the 60-day free pilot. Watch for a confirmation email that will provide instructions for proceeding to the next step.

2. Import your data / Invite teachers to the pilot: Complete a roster sync: populating teachers, courses, and students for the current term. Invitations to the GradeCam account will be automated or manually sent. Teachers must accept the invitation to join the account. Make sure the gradecam.com domain is a whitelisted website in your district (to test this download the GradeCam Plug-in).

3. Establish Evaluation Criteria: Collaborate with key decision-makers to establish metrics for success. We suggest a simple ROI and teacher survey:

- ROI (Quantitative): We estimate ____ time saved for teachers. (4 min/scan x Teacher Cost)
- Survey (Qualitative): Teacher feedback and overall impressions.

4. Teacher Training Day: Kick-off the pilot with a 30-minute required Professional Development session for teachers to learn how to use GradeCam Go! Note: Successful pilots have at least 25% teacher participation.

We are here to help you through every step of the process. Please contact support@gradecam.com or your Proven Learning Educational Consultant with questions.
